Art Unit: 3652

1. The replacement drawings (sheet 1) were received on 11/5/03. These drawings are approved.

2. Newly submitted claims 20-24 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 2-19, drawn to a substrate loading apparatus, classified in class 414, subclass 217.
- II. Claims 20-24, drawn to a substrate loading and cooling apparatus , classified in class 165, subclass 80.2.

Claim 1 link(s) inventions I and II. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claim 1. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Art Unit: 3652

3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as cooling the substrate. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 20-24 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

6. Claims 1-4, 6-8, 11, and 18-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Helms et al in view of Kato et al.

This rejection is set forth in prior Office action, paper #3, paragraph 7.

7. Claims 9-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Helms et al in view of Kato et al, as applied to claims 1 and 8 above, and further in view of Stevens et al.

This rejection is set forth in prior Office action, paper #3, paragraph 8.

8. Claims 5 and 12-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Helms et al in view of Kato et al, as applied to claims 1 and 8 above, and further in view of Carr et al.

This rejection is set forth in prior Office action, paper #3, paragraph 9.

9. Applicant's arguments filed 11/5/03 have been fully considered but they are not persuasive.

Applicant argues that Kato is directed to a wafer inspection apparatus rather than a processing chamber and that the space required for the supporting arms would not be available in the close confines of the processing chamber of Helms. In response to applicant's argument that Kato is nonanalogous art, it has been held that a prior art reference must either be in the field of applicant's endeavor or, if not, then be reasonably pertinent to the particular problem with which the applicant was concerned,

Art Unit: 3652

in order to be relied upon as a basis for rejection of the claimed invention. See *In re Oetiker*, 977 F.2d 1443, 24 USPQ2d 1443 (Fed. Cir. 1992). In this case, not only is Kato in the same general field of wafer handling, but it is also pertinent to the particular problem with which applicant is concerned, i.e., supporting substrates of varying size. While Kato admittedly is not directed to the exact environment (a processing chamber) as Helms and applicant, it is noted that claim 1 does not include the chamber *per se* as a positive limitation, but only as a *for use* limitation. Furthermore, it is noted that the apparatus of Kato operates in a manner analogous to that of Helms, i.e., the support moves vertically to enable an external arm to maneuver wafer to and from the support. Finally, the test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary reference; nor is it that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981).

10. Claims 16-17 are allowed.

11. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 3652

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
